	Examiner William P Neuder	Art Unit 3672	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

A

DETAILED ACTION

Claim Objections

Claims 1 and 20 are objected to because of the following informalities: The last two lines of claim 1 do not read well. It is suggested applicant replace them with – electrical polarity to pass through the element, and preventing a signal having a second electrical polarity from passing through the blocking element--. In claim 20, line 2 “in open” should be –is open--. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1,8-10,16,22 and 26-29 are rejected under 35 U.S.C. 102(e) as being anticipated by Brooks et al 6386108.

Brooks discloses a perforator 15 being carried on an electric line 13. The charges of the gun are electrically actuated. Switch 62 serves as an isolation system to allow a signal of a first plurality to pass and blocking a signal of a second plurality. As to claim 8, the switches are of the diode type. As to claim 9, multiple diodes and switches are used. As to claims 10 and 22, a surface control activates the switches. As to claim 26, downhole controllers can also be used to activate the device. As to claim 27, the

method comprises blocking all signals to the device except for the specific triggering signal that is allowed to pass and eventually detonate the gun. As to claim 28, a diode blocks the signal. As to claim 29, switch 62 blocks the signal in the open state and allows the signal in the closed state.

Allowable Subject Matter

Claims 2-7,11-15,17-21 and 23-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P Neuder whose telephone number is 571-272-7032. The examiner can normally be reached on Tuesday through Friday.
